This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. LIBRARY REGULATIONS.

THE Council, with a view to the convenience of the Fellows generally, and to the better care of Works that are easily injured, have deemed it expedient to make the following regulations, in conformity with Section XIX. Art. 1. of the Bye-Laws.

1. The Books shall only be delivered to a Fellow of the Society, or to some one producing a written order from such Fellow; and a receipt shall be given by the person to whom the book is delivered (expressing the name of the Fellow for whom it is received), in a book kept for that purpose.

2. Any Fellow failing to return a book on the application of the Council, or returning books torn or defaced, shall be considered as liable for their value; and if they are separate volumes, for the value of the whole work rendered imperfect.

3. All books allowed to circulate may be retained a fortnight; after the expiration of that time, every book shall be immediately returned, so soon as the Fellow shall receive an intimation from the Librarian that it is wanted; and after the expiration of one month from the date of its having been delivered from the Library, every book shall be returned.

4. All books shall be returned on the 1st of November for a fortnight, and the Librarian shall afterwards deliver a report to the Council on the state of the Library.

5. No Fellow shall have in his possession at one time more than Six Volumes, without the permission of the Council.

6. Any Member failing to comply with the above regulations after receiving notice from the Librarian, shall be fined half-a-crown for

every week that a volume is detained beyond the time allowed; and the privilege of having books from the Library shall cease, until the fines are paid and the books are returned.

7. All charges of carriage and delivery of books, &c. to and from Fellows, shall be defrayed by the Fellow borrowing the same.

EXCEPTIONS.

I. There are certain books which cannot be allowed to circulate. A list of these shall be prefixed to the printed Catalogue of the Library; and a notice of such additions to that list as the Council may from time to time feel it necessary to make, shall be fixed up in the Library.

II. No Map, Section or Drawing, can be allowed to circulate without permission in writing granted by the Council, or by the President or one of the Secretaries.

III. No book or illustration in loose sheets shall be allowed to circulate.

IV. No Periodical Publication, and no Volume or Part of the Transactions of any Society shall be allowed to circulate until after the expiration of four months from the date of its having been received at the Society.

V. All new works shall circulate amongst the Fellows after the expiration of a fortnight from the time of their being received, unless the Council (or, during the recess, the President or one of the Secretaries) shall determine otherwise.

No Book lent *to the Society is allowed to circulate without a written order from the Proprietor.*

PREFACE.

THE Council being desirous of rendering the Books, Maps, Charts and Sections in the possession of the Society more available and more extensively useful, directed the Vice-Secretary in the spring of last year to turn his attention to the preparation of a printed Catalogue. In the course of the summer Professor Ansted submitted to the Council a plan of one, which, with some slight modifications, was approved of; and he was instructed to carry it into execution with as little delay as possible consistently with his other duties.

The plan of classification will be seen by referring to the Table of Contents. The works are grouped, as nearly as was practicable, according to subjects; and the index of the names of authors and of places at the end of the volume indicates the page of the Catalogue in which the full title of any work will be found.

A copy of the Catalogue of the Books is in the Library, marked with references to the Case and Shelf where each work is placed; and a copy of the Catalogue of the Maps, Charts and Sections is in the Museum, with similar references to the Cases and Portfolios

Digitized by Google

in which they are respectively contained. In these copies of the Catalogue all additions will be inserted, until a new edition is called for.

Fellows wishing to borrow a work, and applying for it by letter, must give the full title of it and the page of the Catalogue where it stands.

The Society has long been in possession of a valuable series of Manuscript Catalogues prepared by Mr. Lonsdale, and completed to the time when he resigned his office in the Society, chiefly referring to memoirs in publications possessed by the Society.

These Catalogues consist of six series, and are contained in ten folio volumes. The following titles of them will fully explain their nature and value.

1. *General Treatises and Memoirs on Geology; alphabetically arranged.* One volume.

This may be best described as containing a list of various memoirs relating to geological subjects and not conveniently arranged under either of the other heads adopted. The alphabetical arrangement has reference to authors' names*.

2. *Topographical Catalogue of Geological Works and Memoirs; alphabetically arranged.* Four volumes.

These volumes include localities in (1) Europe, (2) Asia, (3) America, and (4) Africa, Australia, Islands in the Pacific, etc. The alphabetical arrangement has reference to the names of places.

3. *Works and Memoirs on Organic Remains; alphabetically arranged.* One volume.

In this volume the arrangement is alphabetical according to the subject.

* It may save time to those who consult this Catalogue, to know that the prefix *de* or *von* to a name is invariably considered to refer it to the letters D or V.

Digitized by Google

4. *Maps and Plans connected with Geological Memoirs.* One volume.

5. *Sections connected with Geological Works.* Two volumes. Vol. i. A to L, Vol. ii. M to Z.

In the three volumes with the titles 4 and 5 are not merely Geological maps and sections, but a great variety of plans, profiles, etc. containing many sources of information bearing on Geology, and always extremely difficult to refer to without some help of this kind. The order of arrangement is alphabetical with respect to places.

6. *Views and Diagrams connected with Geological Works.* One volume.

It is intended that these Catalogues shall be continued from the date where Mr. Lonsdale left off, and that they shall be kept up.
